Macro approach to financing healthcare and medicinal products

Balance of the Health Insurance Fund

Health Security Fund	2015. I-XII.	2016 original appropriation	2016		
			I-XII. months	% of appropriation	% of last year
Total of Budgetary Expenditures	1 955,3	1 963,7	2 133,1	108,6%	109,1%
Curative preventive provisions	960,6	982,4	1 089,9	110,9%	55,7%
Medicine subsidies	326,2	305,1	349,8	114,7%	36,4%
Medicine subsidies (pharmacy)	310,6	231,4	327,9	141,7%	100,5%
Total of Budgetary Revenues	1 925,4	1 963,7	2 043,9	104,1%	658,0%
Social Security Contributions	1 223,4	1 417,0	1 479,5	104,4%	76,8%
Contribution of Pharmaceutical Manufacturers and Wholesalers	65,3	58,0	71,6	123,4%	5,9%
Balance	-29,9	0,0	-89,2		-136,7%

Billion HUF

In 2016 the Health Security Fund's deficit was 89,2 billion HUFs, while the revenues exceeded the provision with 80 billion HUFs (+4,09%), the expenditures was higher with 169 billion HUFs (+8,63%). The contribution of pharmaceutical manufacturers and wholesalers was higher with 13,6 billion HUFs (+23,4%), due to the higher revenue (+10,8 billion HUFs / +154%) from price volume agreements (PVA) and other contributions (+2,8 billion HUFs / +5,43%). The fulfilment of medicine subsidies was higher with 44,7 billion HUF (+14,7%) than the original appropriation, of which special purchase medicine took 6.2 billion HUF (+39.5%). Pharmacy drug expenditures shows 96.5 billion HUF (41.7%) overspending, partly because the appropriation does not include repayments, that added 71.6 billion HUF to the appropriation in the last quarter. Pharmacy drug expenditures were fulfilled with 25 billion HUF (+10.8%) actual overspending, compared to the appropriation. The overspending occurred mainly for two reasons, the higher turnover of medicines via compassionate care (+14,2 billion HUFs / +175%) and higher reimbursement turnover of medicines without reference price group (+6%).

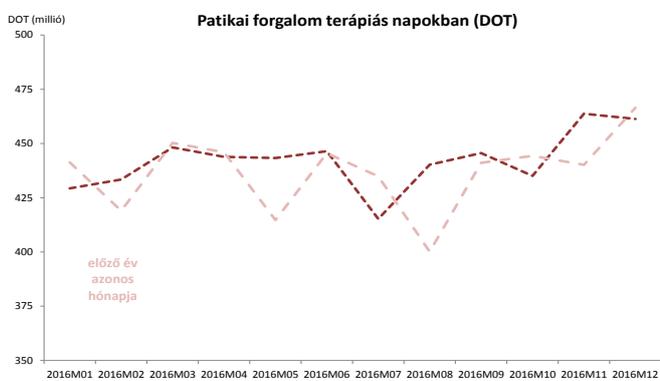

Changes to subsidised medicinal product categories

Dynamics of the sales/circulation of prescription-only-medicine

Source: Healthware analysis based on OEP's data

Source: Healthware analysis based on OEP's data

Prescription drugs' DOT turnover in 2016 was 1.18% higher than in 2015, so the trend of drug consumption is still increasing, but in slower rate than in 2014 (2.74%) or 2013 (2.23%). Meanwhile, the reimbursement turnover was higher with 5.56%, because of the additional 14.2 billion HUF fulfillment of special permission appropriation, the 6% growth of reimbursement turnover of out-of-fix group products, and stagnation of fixed market. The average reimbursement per DOT was higher with 4.33% than the 2015's average. New ATCs that got authorized in 2014-2016 generated 7.6% of annual reimbursement turnover, while only 1.1% of annual DOT turnover.

Enforceable allowances from payment obligations of pharm industry after R&D expenses — Case study

Based on the paragraphs (10)-(12) of the drug-economical Act¹, MAHs may require allowance from their repayment obligations, involving the 10% and 20% tax-payment obligation due to the ex-factory price-proportional reimbursement turnover of pharmacy drugs and Rep fees, depending on their R+D expenses. Measure of discount in current year might reach up to 20-60-90% of repayment obligations of previous year, depending on the rate of R+D expenses compared to ex-factory price-proportional reimbursement of previous year. Amount of R+D expenses to be taken into consideration are determined by Governmental Decree² including detailed rules and Acts about accounting³, corporate tax⁴ and innovation⁵. Current laws strictly limit considerable R+D investments, as well as entitled companies. Furthermore, in order to reach 90% discount, R+D investments need to reach more than 25% of ex-factory price-proportional reimbursement, and even in case of the lowest, 20% discount, the condition is to reach 15%. In all cases the minimum condition is to have personnel expenses in the rate of 3% of ex-factory price-proportional reimbursement. Based on the Governmental Decree No. 162/2009 (VIII. 3.), allowances can be enforced from the month of publishing annual report, but not earlier than July. Claimed allowance has no deadline, can be enforced as total amount, by fulfill the monthly payment obligations as net value (reduced with allowances). General condition of the claim is the continuous presence on the market of reimbursed pharmaceuticals, because the allowances can only decrease the expense of future repayment obligations. Measure of discount received on industry level is not publicly available, but the total amount might be estimated based on the 10% and 20% repayment obligations^{6,7}, number of sales representatives⁸, and the data published in discharges, and the fulfillments of Health Insurance Fund's payments⁹. Each calendar year, fulfillment takes place regarding repayment obligations of October – December of the year before, and January – September of recent year (according to legal regulations, fulfillment has to be done by the 20th day of 3rd month). For this period, 10% and 20% repayments and wholesale trade tax obligations can be calculated by using monthly level data, while Rep fees can be calculated based on data regarding first three quarters and whole year, published by the Health Fund. The payment obligations continue to significantly exceed the payments fulfilled, partly due to the deductions enforced by the repayments based on price-volume agreements which lower the 10% and 20% repayment obligation (yearly amount is also public information). Obligations to be fulfilled are significantly higher than fulfillment of title „Revenues and repayments from MAHs, distributors, wholesalers” even after the discount corrections due to price-volume agreements. As a result of the previously described, there's a yearly difference of 8.9-12.7 billion HUF between the sum defined as liability and the financially settled payments of the pharm industry between 2013 and 2016, which come from the upper limit of the deduction enforced at the industrial level on R&D expenses. According to the discharge acts the stocks of the back taxes are not significant, but the HUF 2-2.5 billion overpayment may include industrial payments that could not have been accounted for until the beginning of March due to the ongoing information flow between the National Tax and Customs Administration and the National Health Insurance Fund. Though, as a consequence these items could not be identified in the discharges, it stands to reason that these are a part of the current year's industrial payments, thus these may reduce the gap between the outstanding liabilities and the financially settled ones.

Table 1.: Differences between industrial payment obligations and fulfillment

	2013	2014	2015	2016
1. Payment obligations to be settled in the current year (arising from October, the year before to September, current year; estimation)	63 771 M	61 243 M	67 784 M	71 034 M
2. Enforced deductions from the 10-20% payment obligations due settled payments based on price volume agreements (NHIF) (-)	1 669 M	1 827 M	2 170 M	4 568 M
I. Adjusted payment obligations to be settled in the current year (1-2.)	62 102 M	59 416 M	65 614 M	66 467 M
II. Revenues and repayments from MAHs, distributors, wholesalers (fulfillment)	51 066 M	50 546 M	54 979 M	53 768 M
Difference between payment obligations and fulfillment (I-II)	11 036 M	8 870 M	10 635 M	12 699 M

There is no public information about the range of companies that are eligible for claiming this allowance. Only in the stock exchange reports¹⁰ continuously published by Richter can be found such data with which by comparing them to the public data above the claimed allowance of the manufacturer can be estimated. By comparing these to public data the deduction granted to the company may be estimated. In case of the 10% and 20% payment obligations only those products were taken into consideration, in which case the Richter was named as the distributor in the published payments data in the given month, whilst in case of the Rep fee payments the calculations were based on the average number of sales representatives in the lists published weekly by the National Institute of Pharmacy and Nutrition. Based on the reports between the business years of 2012 and 2016 Richter may have enforced the highest, 90% allowance based on the R&D expenditures of the year before, as a result the company reduced its payment obligations by HUF 2.8-3.5 billion.

Table 2.: Difference between accounted repayment obligations according to Richter Gedeon PIC. reports and arising obligations based on public information

Year	Arising payment obligations			Accounted obligations			Enforced deduction		
	10% és 20%	REP	Total	10% és 20%	REP	Total	10% és 20%	REP	Total
2012	1 900 M	1 841 M	3 741 M	487 M	431 M	918 M	1 413 M	1 410 M	2 823 M
2013	2 068 M	1 720 M	3 788 M	346 M	185 M	531 M	1 722 M	1 535 M	3 257 M
2014	2 059 M	1 677 M	3 736 M	168 M	162 M	330 M	1 891 M	1 515 M	3 406 M
2015	2 273 M	1 696 M	3 969 M	192 M	219 M	411 M	2 081 M	1 477 M	3 558 M
2016	2 416 M	1 680 M	4 095 M	369 M	253 M	622 M	2 047 M	1 427 M	3 473 M

EGIS, up to the business year of 2012/2013 – until stock exchange delisting – enforced 1.2 billion HUF allowance in 2012, and 2.3 billion HUF in the first three quarters of 2013 based on published reports¹¹. On 30th of September 2013, a further amount of HUF 3.4 billion was recorded as allowance to be deducted from the obligations, thus in 2013 and 2014 the payment obligations may have been reduced approximately by 3 billion HUF. 10% and 20% payment obligations and the number of registered sales representatives of EGIS had similar extent in the period of 2014-2016, so the enforced allowances are likely to have been similar as well, if the company was entitled to 90% allowance based on the R+D investments. Based on the strategic agreements¹² with the government member companies of the Teva, Servier, Sanofi-Aventis and GSK groups, or smaller manufacturers who are members¹³ of the Hungarian Pharmaceutical Manufacturers Association (MAGYOSZ), and who have also R+D activity, may be entitled to enforce allowances based on their R+D expenditures from their payment obligations.
